

Control pressure switch MDR - F

- 1 SPDT / 2 DPDT - Normally Open / Normally Closed (NO/NC)
- Pressure range up to 250 bar
- GL / VdS / UL approvals -optional
- Scale for simple adjustments
- Wide range of variations
- Acc. to EN 60947

Applications:

Air pressure technology, water pressure technology, construction machinery, water-based extinguishing systems, fire protection units, oil pressure monitoring, mining, chemical, industry, railway vehicles, offshore, shipping, vacuum technology, calibration technology, heating systems

Specific applied approval

MDR – F ..H-S

Application

The Condor pressure switch series MDR-F can be **universally used** and are suitable for:

- **Monitoring and controlling the pressure of liquids or gaseous media** in pipelines, tanks, vats, pressure vessels and installations.
- **Tasks in process control**, cooling, pneumatics and hydraulics.
- **Pressure monitoring of cooling circuits and lubrication systems** on various types of machinery.
- **Automatic switching of pump and compressor motors** for supplying water to dwellings, booster pumps, fire-fighting equipment and on compressed air systems.

Mode of operation:

The pressure of the monitored medium operates against a diaphragm, bellows or a plunger all of which have different media resistance. Switching operation is carried out with the use of a micro switch ensuring flutter-free switching

When the pressure reaches the upper switching point, the micro switch contacts change position. In normal cases e.g. a connected motor is switched off (up to 550 watts direct or using additional switches like a contactor etc.). Should the pressure fall below the lower switch point, then the micro switch contact returns to its default position and the motor is switched on.

The upper and lower switching points can be set independently using a screw driver. Both switching points can be read off the scale.

Pressure connection, pressure sensing element and electrical connections are all fitted on to a die-cast aluminum base. The sealable transparent, polycarbonate cover protects the scales and switch against environmental effects.

Standard scope of delivery:

- rubber grommets
- MDR-F..H Die-cast aluminum flange
- MDR-F..Y Plastic flange (in particular for use in water technology applications)
- **With industrial screw connection**
(Industrial clamp version available upon request)

Besides the standard types with Perbunan diaphragms, the following new types are available:

- **Pressure switch with stainless steel pressure sensing element** e.g. for liquid fuels, oils up to 200°C etc.
- **High pressure switch with plastic plunger press. sensing element** with stainless steel connection up to 250 bar
- **Pressure switch with manual reset function and die-cast aluminum flange** for oil, water and air etc.
- **Pressure switch with Viton diaphragm and die-cast aluminum flange** for increased media resistance
- **Pressure switch with VdS approval** for fire-extinguishing systems / fire protection-installations
- **Pressure switch with GL approval** for ship building and applications intended for use at sea
- **Pressure switch with Atex approval** in mining and chemicals plants that are at risk of explosion
- **Pressure switch with UL approval** for the North American market
- **Vacuum**
- **DPDT**

The MDR-F pressure switch program is extended continuously. A current status of the existing designs and approvals is available on our homepage.

Control pressure switch MDR - F

MDR-F standard version with die-cast aluminium flange

MDR-F standard version with die-cast aluminium flange and Perbunan diaphragm - for oil, water and air etc. . Pressure switch with industrial cage clamp version.
 Connection: H G 3/8" inner thread **
 - suffix "G" for gold-flashed contacts

MDR-F version with reset function (Hmin / Hmax and Htro) with die-cast aluminium flange

MDR-F version with reset function (Hmin / Hmax and Htro) with die-cast aluminium flange and Perbunan diaphragm - for oil, water and air etc. Pressure switch with industrial cage clamp version. Pressure connection: H G 3/8" inner thread

MDR-F .. Hmax (SPDT with manual reset max.)

When pressure rises above the upper setting value, contact 11-12 opens and contact 11-14 closes and latches. When the pressure falls below the upper setting value, the contact can be released with the manual reset button.

MDR-F .. Hmin (SPDT with manual reset min.)

After pressure rises above the lower setting value, the function is activated by pressing the manual reset button. When the pressure falls, contact 11-12 closes and opens contact 11-14 when reaching the lower cut-in value. Since the upper switching point (cut-out pressure) of the reset pressure switch must lie above the maximum cut-out pressure of the apparatus, the switching state remains until the manual reset button is pressed again.

MDR-F .. Htro (SPDT with manual reset as run-dry protection)

Typically, the switch is connected in series with the control circuit. For pressure increase, the manual reset button must be held until the pressure lies beyond the monitoring point. When the pressure falls below the monitoring point, contact 11-12 closes and contact 11-14 opens. When the pressure automatically rises above 10% of the monitored pressure, contact 11-12 opens and contact 11-14 closes again automatically, otherwise, a restart using the manual reset button must be carried out again. NOTICE: Should there not be a rise in pressure when pressing the button, discontinue pressing the button as a fault in the system must be present.

VdS pressure switches for water extinguishing systems / fire-fighting equipments

These pressure switches are primarily conceived for the use in firmly installed water extinguishing systems / fire-fighting equipments and approved from the VdS damage-prevention under the NO. G 4090008.

In particular, selective examinations, the request-profiles, the quality and the functionality intensively are tested.

Dependent on the use there are:

- Alarm pressure switches (MDR-F 2...VdS...), which are manufactured with a pressure range from 0,35 to 1 bar with minimal difference, and
- Pressure switches (MDR-F X...VdS...), with 10, 12,5 or 16 bar set for X, which limit the maximum pressure

VdS pressure switches for water extinguishing systems / fire-fighting equipments

difference between cut-in and cut-out pressure to 1,5 bar.

As MDR-F...VdS with reset function, standard only the alarm pressure switch is as max.-Reset listed. However, it is all VdS pressure switch with each reset function (see overview MDR-F with reset function), alternatively a Viton diaphragm and / or also a flange with 3/8" inner-screw threads on inquiry available.

Moreover, customer-specific boards with own circuits and LED in integrated design are available as well as realisable. Further information can be seen on our homepage: www.condor-cpc.com.

Please take into account that the use of the pressure switch with plastic flange is restricted up to 10 bar.

GL Pressure Switch for Ship Building and Applications Intended for Use at Sea

These pressure switches are mostly used in the field of shipping technology, particularly in ship and plant engineering, and are approved by GL (Germanischer Lloyd); one of the largest classification societies in the field of shipping, under No. 86884-10 HH.

The requirement profiles, quality and functionality have been intensively tested by means of specialized, demanding tests.

Our GL pressure switches can be used up to a maximum of 250 bar. Pressure switches fitted with plastic flanges are approved up to 12.5 bar.

All GL pressure switches can also be fitted with a reset button.

Because of the variety of possible pressure switch configurations, please feel free to simply contact us if you have queries regarding special applications or technical requests.

Condor Pressure Switch for ship Building and Applications Intended for Use at Sea are approved by GL (Germanischer Lloyd).

Control pressure switch MDR - F

MDR-F vacuum monitoring version

These pressure switches can be used as vacuum switches for compressible materials (gases), but also for liquids, within the normal pressure range.

Their range of application includes, for example, the fields of automation, transportation, heating, climate-control and ventilation.

They have been designed primarily for use in the rough vacuum range (technical vacuum) and are distinguished by their small pressure differences and high level of switching precision.

They offer universal application potential as openers, closers or changers.

MDR-F overview - MDR-F .. H (G) - for Vacuum monitoring with aluminium die-cast flange

and with Perbunan diaphragm - for oil, water and air etc. . Pressure switch with industrial cage clamp version.
Pressure connection: H G 1/4" inner thread - suffix "G" for gold-flashed contacts

Order reference	Type Code	Adjustable cut-in pressure (bar)	Smallest pressure diff. (bar)*	Adjustable cut-out pressure (bar)	Weight (in g)	Part No.

MDR-F DPDT version

This pressure switch is characterized by being equipped with a DPDT. As a result, the switch is even more flexible in its range of applications. Due to the variety of possible

pressure switch versions, please simply contact us for questions about special applications or technical requests.

Control pressure switch MDR - F

Technical data MDR-F standard version	
Rated operational current I_e AC 1 $U_e=240\text{ V (1~)}$	10 A
Rated operational current I_e AC 15 $U_e=240\text{ V (1~)}$	4 A
Rated operational current I_e DC 13 $U_e=240\text{ V (1~)}$	0,1 A
Permissible motor rating 1~ 230 V	0,55 kW
Motor switching capacity (UL 508, CSA 22.2) $U_e=125\text{ VAC}$	0,5 HP
Motor switching capacity (UL 508, CSA 22.2) $U_e=250\text{ VAC}$	0,5 HP
Rated operational current I_e (UL 508, CSA 22.2) $U_e=250\text{ VAC}$	15 A
Rated operational current I_e (UL 508, CSA 22.2) $U_e=12\text{ VDC}$	6 A

Technical data MDR-F... Ex	
Maximum switching voltage U_i	200 V
Maximum switching strength I_i	3 A
Maximum internal capacity C_i	negligible
Maximum internal conductivity I_i	negligible
Ambient temperature T_a	$-30\text{ °C} \leq T_a \leq +65\text{ °C}$
Only for connection to a separately examined and certified intrinsically safe circuit in the protection type: Ex ia I Mb (MDR-F... JG... Ex) Ex ia IIC Ex ia IIA, IIB, IIC T6 Gb (MDR-F ... HG...Ex) Ex ia IIIC T85°C Db (MDR-F ... HG...Ex)	

Technical data MDR-F.(G) - gold-flashed contact	
Rated operational current I_e $U_e=30\text{ V (1~)}$	400 mA
Permissible motor rating 1~ 30 V	12 VA
Motor switching capacity (UL 508, CSA 22.2) $U_e=125 - 250\text{ VAC}$	0,5 HP
Rated operational current I_e (UL 508, CSA 22.2) $U_e=250\text{ VAC}$	10 A
Rated operational current I_e (UL 508, CSA 22.2) $U_e=12\text{ VDC}$	6 A

Technical data MDR-F		
Bursting strength / bar	MDR-F.H	4 x max. cut-out pressure
	MDR-F.HE	1,3 x max. cut-out pressure
	MDR-F.Y ($\leq 12,5\text{ bar}$)	4 x max. cut-out pressure
	MDR-F.Y ($> 12,5\text{ bar}$)	2,5 x max. cut-out pressure

Technical data MDR-F	
Vibration resistance 10 bis 1000 Hz	4 g
Degree of protection acc. to DIN 40 050/IEC 529 With rubber grommets	IP 54
Degree of protection acc. to DIN 40 050/IEC 529 With cable glands M20	IP 65
Ambient temperature range	$-20\text{ °C} \dots +70\text{ °C}$
Cross-sections Cage clamp (without cable end sleeve)	1,5 mm ²
Cross-sections Screw clamp	2,5 mm ²

Technical data MDR-F		
Perm. media temperature:	MDR-F.H / HH	+ 70 °C
	MDR-F.HV	+ 130 °C
	MDR-F.HE	+ 200 °C
	MDR-F.Y	+ 50 °C
Repeatability	<2% FS	

Attention: Please, regard the MDR-F instructions enclosing the pressure switch for the max. operating pressure and the max. inspection pressure.

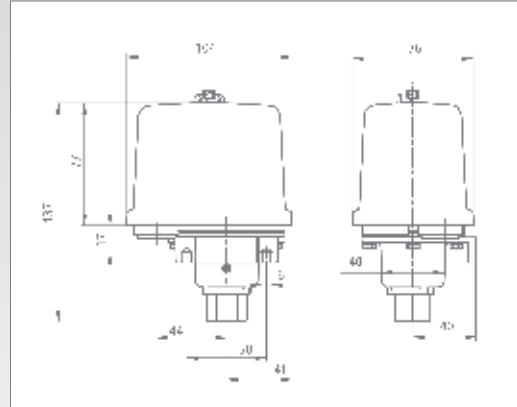

Media resistance MDR-F.	
A detailed overview of diaphragm media resistance for all pressure switches can be found on page 22. Please read the information carefully
