Technical description
The DUNGS double solenoid valve DMV integrates two solenoid valves in one compact fitting.

- Automatic shut-off valves as per DIN EN 161 Class A Group 2
- Two A valves in one housing
- Double seat valves
- High flow rates
- Max. operating pressure up to 500 mbar (50 kPa)
- Fast closing
- Fast opening (DMV-D/11) or slow opening (DMV-DLE/11) with adjustable fast stroke for start gas volume
- Adjustable main volume
- DC solenoid
- Mountable closed position signal contact
- Threaded flange
- Compact, light-weight

Application
Double solenoid valves are used where two single valve were mounted previously. In connection with DUNGS gas regulators and additional components, a wide variety of regulating tasks can be performed.
It does not contain any non-ferrous metals, suitable for gases of up to max. 0.1 vol.% H_2S, dry. Suitable for gases of families 1, 2, 3 and other neutral gaseous media.

Approvals
EC type testing certificate as per:
- EC-Gas Appliances Regulation

Other models available with approval for the North American market: U_L, FM, CSA as well as approvals in other important gas consuming countries.
